# EVENT MITRA

---

# **Introduction**

---

Event Mitra is an excellent choice for event planning. This website is useful for anyone who wish to run whatever sort of Programme they desire. It may be used in many locations such as society, schools/colleges, and even event management organisations.

## **Abstract**

---

The purpose of this project is to create “Event Mitra”. In this project the publisher wants to publish their events and user will take the registration for the event competition. Publisher needs to register and create events. After creating the events any user can see events list and participate. Admin can get the publisher registration list and created events list. To implement this project, we will use full stack languages like PHP, HTML, CSS, Bootstrap, JavaScript, MySQL.

# Literature Survey

---

- **Existing system**:- As per my survey in current market there is no online system to take the registrations of any events so event organizers' waste the time to take the registrations. In current market organizers can add the event in web portal.
- **Proposed System** - We will implement your project name. The purpose of this project is to create “EVENT MITRA”. In this project publisher wants to publish their events and user will take the registration for the event competition. Publisher needs to register and create events. After creating the events any user can see events list and participate. Admin can get the publisher registration list and created events. To implement this project, we will use full stack languages like PHP, HTML, CSS, Bootstrap, JavaScript, MySQL.

# Requirements

## Requirements for developing:-

- Average I3 processor.
- Average 4GB RAM.
- Average 512GB hard disk.

## Hardware requirement for deployment:-

- Average I3 processor.
- Average 2GB RAM.
- Average 256GB storage.

## Software requirement for development:-

- OS (Window's, MAC, Linux).
- XAMP Server.
- VS Code.
- Chrome.

## Software requirement for deployment:-

- OS.
- Chrome.

## Language used or technology:-

- Content language (client side language) (HTML, CSS, Bootstrap, JavaScript).
- Backend (server side language) (PHP).
- Database (MySQL).

# **Advantages**

- Reduce the time of user.
- Reduce the manual work.
- Easy to use.
- Access from any location.
- Easily event registration.
- No wastage of money.

# Use Case Diagram

# Methodologies Used

Agile methodology is a process for managing a project that involves constant collaboration and working in iterations. Agile project management works off the basis that a project can be continuously improved upon throughout its life cycle, with changes being made quickly and responsively. Agile is one of the most popular approach to project Management due to it's flexible, adaptability to change, and high level of customer input.

## Phases of Agile model

- Requirement Gathering
- Design the requirements
- Construction or Iterations
- Testing and Quality assurance
- Deployment
- Feedback

# Implementation part

- Admin modules

Admin login: - In this using username and password admin can login.

View publisher registration: - In this admin can view the publisher registration list.

Manage and view events: - In this admin can view event list, and they can approve and disapprove events.

- Publisher modules

Publisher registration: - In these publishers register under admin.

Publisher login: -In these publishers can login after the registration.

Create event and competition: - In this publisher can create event with proper details.

View applied participants list: -In this publisher can view the registered participants list for their event.

- User modules

View event list: - In this user can view the events list.

Apply for events: - In this user can apply for the events

# Future Scope

- Enhanced Features: Event Mitra could continuously expand its range of features and functionalities to better serve its users. This could include integrating advanced event management tools, providing customizable templates, offering real-time collaboration options, and incorporating AI-powered suggestions for event planning.
- Mobile Application: Event Mitra could develop a dedicated mobile application to make event planning more accessible and convenient.
- Integration with Social Media Platforms: Social media plays a significant role in event promotion and engagement. Event Mitra could explore integrating with popular social media platforms, enabling seamless sharing of event details, ticket sales, and generating buzz among attendees through social media channels.

# PUBLISHER DASHBOARD

The image shows a screenshot of the Publisher Dashboard for Event Mitra. The dashboard has a dark teal header bar with the word "DASHBOARD" in white capital letters. Above the header, there's a navigation bar with links: Home, About Us, Dashboard, Post Event, View Events, and Contact Us. The main content area displays a welcome message: "Welcome divya". At the bottom, a black footer bar contains the copyright notice: "© 2023 Event Mitra. All Rights Reserved." The background features a light gray gradient with large, semi-transparent white leaf patterns.
